

Press Release:

For immediate distribution 8/28/14

## WORLD FORMULA Engine Model Updates

Effective immediately

Briggs and Stratton Racing reacting to needs of their racer, shuffles their World Formula offerings for the first time since 2008. Effective immediately, a new World Formula spec, 124435 8106-01, is now available. This is the SAME base engine without the starter, flywheel starter ring gear, and clutch. "With the World Formula engine being raced in so many areas of motorsports outside of the FIA karting classification we wanted to release a model to cater to these racers", stated David Klaus, Director- Briggs and Stratton Racing. "By removing components racers not always used we now have a price reduction of **\$200** to the suggested MAP price."

The MAP price of the new 8106 spec will be \$810.00.

In addition, our complete World Formula package, 124435 8104-01, will be update to a new model and type, 124435 8105-01 with the same MAP pricing of \$1010.00. This will still be the same, complete World Formula package including our onboard electric starter system, clutch package, and exhaust pipe. Model 8104 is now NLA.

"Cost-effective racing, now even more so....."

### NEW World Formula Engine line-up

Complete WF package – 124435 8105-01 (same as 8014 spec)

Base engine minus starter, starter bracket/ring, and clutch (pipe still included) – 124435 8106-01

124435 8104-01 is no longer available
